

# E-Seek M280 Drivers Install

**IDScan.net**

## Intro

This short guide will inform you on how to properly install the drivers for the E-Seek M280 scanner.

## Getting Started

First thing you'll want to do is download **2 drivers** located on our website here:

<https://idscan.net/support/driversfirmware/>.

Under E-Seek > M280, download the two drivers listed (**Driver download** and **Image driver download**).

E-Seek

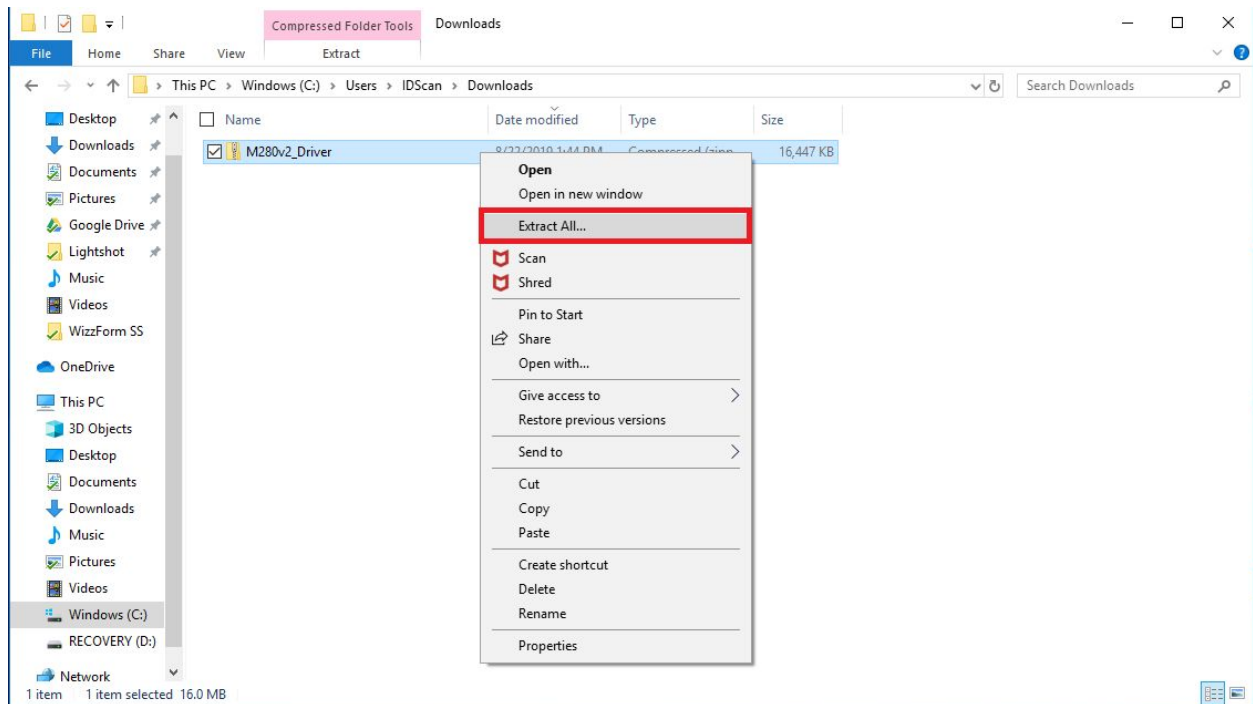

M200, M210, M250, M260

Driver download

M280

Driver download, Image driver download,

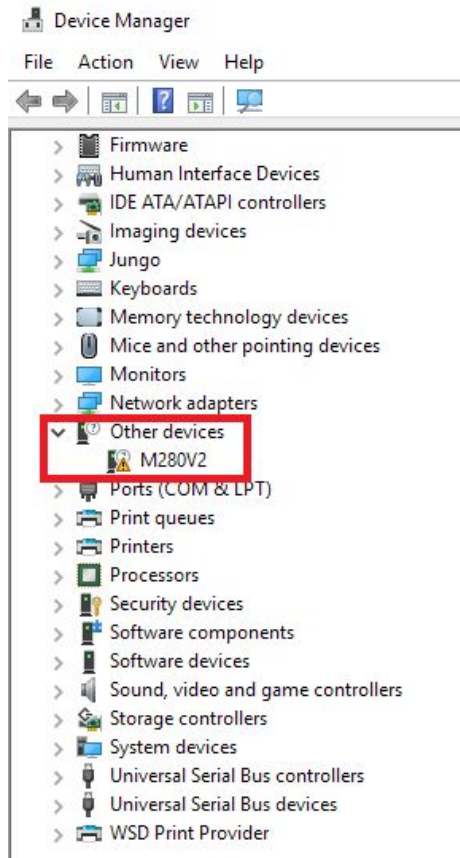

Navigate to where your downloaded files are located and right-click the .zip file named **M280v2\_Driver** and select **Extract All**.

## Install

Run the setup file named **CDM21228\_Setup.exe** (Driver download).

Open Device Manager and Look for Other devices > M280V2.

Right-click on M280V2 and select Update driver.

Select Browse my computer for driver software.

← Update Drivers - M280V2

How do you want to search for drivers?

→ Search automatically for updated driver software  
Windows will search your computer and the Internet for the latest driver software for your device, unless you've disabled this feature in your device installation settings.

→ Browse my computer for driver software  
Locate and install driver software manually.

Cancel

Browse to where you previously extracted the M280V2\_Driver.zip to and select your appropriate OS from the list.

Your scanner should now be ready to use.
